## Benefits of Membership

### Channel-only Distribution

Founded in 1984 as a traditional VAR, NMGI understands what VARs want and need. We limit over-exposure and work with you to close business and build success.

### No Web Pricing

NMGI does not post MSRP pricing. You set pricing for systems and services based on your market and value-add.

### Low or No-Cost NFR Systems

Each Reseller is eligible for one NFR system to use in-house to learn and demo the product. (Free with sale.)

### Free Training; No Certifications

NMGI offers free online Sales and Technical training, webinars and training materials. Onsite training is available.

### Brand Your Marketing Materials

Customize sales and marketing tools including presentations, datasheets, competitive and industry information.

### Learn One Product: Appliance or ASP

Cover all customers with one product; your engineers will thank you. Monitor using N-able, LPI or other options.

### Co-op Marketing Opportunities

Resellers may qualify for MDF based on sales levels and marketing plans.

The **DoubleCheck Annual Software Maintenance Contract** includes:

1. **Automatic updates** of anti-spam engine, rules and technologies.
2. **Automatic updates** of anti-virus and phishing engines.
3. **Automatic updates** of features, reports, admin console and system.
4. **Automatic remote back-up** of configuration files.
5. **Free support** by phone and email.

A 3-year parts and labor depot warranty is included with each system.

FEATURE	FUNCTION	BENEFIT
<b>System Configuration</b>		
Network appliance, Software or ASP options	Combined software/hardware solution.	Easy, low cost installation and ownership.
Tower system (Celeron 2.53 GHz, 512 MB)	1,250 queue messages/hr. (average)	Simple, small and powerful form factor.
Rack system (P4 2.8 GHz, 1 GB, 1U)	2,000 queue messages/hr. (average)	Additional capacity in rack system.
Licenses: Under 250 users, 250+	Straightforward and flexible license levels.	Simple and economical licensing model.
Local and remote configuration file backup	Access for support and daily backup.	Simplified support and restore of settings.
Annual Maintenance Contracts	Subscription update for services and support.	Reduce admin costs. Improve performance.
3-Year Hardware Warranty (included)	Covers hardware parts and labor for 3 yrs.	Reduce risk and improves project life.
<b>Spam Filtering</b>		
Multi-User, Multi-Role Login	Global, per-domain and per-user settings.	Provide flexibility and control to individuals.
Over 800 customizable heuristic rules	Score messages against proven criteria.	Improve accuracy, productivity and ROI.
Tiered Scoring Thresholds (customizable)	Identify, tag, quarantine, delete, reject spam.	Increase control while tracking all messages.
Real-time IP and Domain Blacklist Support	Known lists of spam senders and URLs.	Reduce network traffic; offload processing.
Auto Whitelisting and Custom lists	Allow and stop addresses and domains.	Improve productivity and control.
Bayesian Classification	"Tokenize" email based on spam/not spam.	Improve "grey area" email scoring accuracy.
Support for Razor, Pyzor and DCC	Leverage checksum clearinghouses.	Improve spam scoring accuracy.
<b>Content Filtering / Policy Management</b>		
Block text in email Header and Body	Enforce acceptable content policies.	Improve content control and spam accuracy.
Block attachments	Enforce acceptable content policies.	Reduce traffic and improve security.
Support for wildcard and regular expressions	Create custom or unique policies as needed.	Reduce traffic and improve security.
Global, Domain and User-level Policies	Allow settings to vary as needed.	Improve control, flexibility and security.
<b>SMTP Management</b>		
Outbound email scanning	Log and report on outbound email traffic.	Expand knowledge of email use and users.
Outbound Signatures and Disclaimers	Add global, domain or user-level content.	Enhance regulatory compliance, marketing.
Anti-relay, plus Daemon/Message config	Limit access due to multiple criteria.	Eliminate unauthorized use and server load.
Multiple mail routes/domains	Support traffic for multiple domains.	Reduce duplicate costs and admin.
Recipient Verification with Exchange/others	Verifies recipients via LDAP.	Eliminates unnecessary traffic; saves time.
Bad Sender/Bad Recipient lists	Stop traffic at SMTP level.	Reduce network traffic and storage.
SMTP Access Rules	View rules and settings for IP ranges.	Enhance administration and control.
Support for Sender Policy Framework (SPF)	Filters and delivers SMTP traffic.	Reduce spam, viruses and forgery.
<b>Phishing and Virus Scanning</b>		
McAfee AV engine	#1 AV engine and R&D worldwide.	Protect network, users and reputation.
Automatic virus signature updates / extra.dat	Continuously checks for virus updates.	Increase protection; reduce admin costs.
Attachment scanning	File attachment name, type or size.	Reduce likelihood of virus attacks.
Dedicated Phishing engine	Continuously checks for phishing updates.	Reduce likelihood of phishing attacks.
<b>Logging, Reporting, Monitoring and Alerting</b>		
Management, "Quick" and System reports	View, analyze and monitor traffic trends.	Proactively manage email based on data.
Logging, detailed and "Quick" Search engine	Log inbound (and outbound) email headers.	Improve business intelligence from email.
Spam, Virus, Policy and Email reports	View, analyze and modify email traffic trends.	Proactively manage email based on data.
Per-Domain and per-user logs and reports	View, analyze and modify email traffic trends.	Improve decisions and policies tied to email.
Trend, Performance and ROI charts	Understand traffic and productivity issues.	Proactively monitor system and traffic.
